

The Story of Light, Path to Enlightenment

(third edition)

by S. Roger Joyeux

Antara Publishing, 2011

Paperback, eBook

159 pages, perfect bound

The Story of Light is a comprehensive and divinely inspired body of knowledge about how divine light works on Earth and in the heavens. Never before have there been so many individuals seeking the road to enlightenment! When ***The Story of Light, Path to Enlightenment*** first came out in 2000, very few were ready to hear its message, and even fewer were ready to work with it. Since then, consciousness has risen significantly, and is now spreading to all who choose to be spiritual. ***The Story of Light*** is a unique and valuable resource for the devotee at any level of spirituality who seeks to understand the spiritual journey and the way divine light works with us on Earth. It is thorough, comprehensive, and carries the depth of divine wisdom.

Chapter One gives you the foundation principles that govern divine light. It illuminates our mission and purpose, the structure of God's Oneness, the problems of density, and the reasons we are not enlightened beings as we arrive on Earth. Chapter Two, "The Etheric Body", could not wait; it had to be placed as near to the beginning as possible. The etheric body's role in working with light is integral to almost every discussion that follows. Our personal identity, protection, vibrational stability, and everyday interaction with the world around us depend on the etheric body's ability to manipulate light frequencies. Learn how etheric blueprinting encodes your karma, solidifies bonding at birth, and sets your astrological chart. Chapter Three explains what you need to know to get on, and stay on, the spiritual path. It helps you understand the creation of the first chakra and the innovations that will help you raise your kundalini. Chapter Four explains how you can use each of the seven major chakras to advance your enlightenment on Earth. It explains how the chakras work with light and light frequencies as their contribution to the enlightenment process. The final chapter, "Enlightenment", explains enlightenment. Definitions for the higher-self, the Light Body, and the soul, set the foundation to explain how you can achieve enlightenment. Enlightenment is a straightforward process that anyone having dedication, discipline, and love can complete.

The Story of Light, Path to Enlightenment takes the language of the light from the dimensions of the beyond and the beyond-the-beyond and translates it into everyday English.
